Harry:

Sorry I didn't catch your call ... typical day of running around between meetings ...

I was aware that ERT was trying to develop an air sampling and analysis method for 4-MCHM. Jack Kelly has kept Janine Dinan, of my staff, in the loop re. the effort. Last we heard, though, was that there were still problems finding an appropriate sorbent and sampling device, so, neither of us knew that a method had actually been developed. Is one actually developed ?

[REDACTED]

Let me know if we should discuss further.
Thanks,

Tito,

The reason I was trying to contact you this PM was the e-mail request below from OSC Jack Kelly.
You may recall Raj had developed an analytical method for MCHM in air. [REDACTED]

Subject: RE: Final SOP for 4-MCHM in Air

Raj,
We should talk when you have a minute.
First, can we share this SOP with others? Right now, with the contractor doing cleanup for Freedom Industries.

Second, it looks like there is renewed interest in doing sampling again. MCHM was found in some water field blank samples.

[REDACTED]

So.....WVDEP would be interested in your collecting air samples right where the cleanup work will be ongoing.

Sort of where one would expect highest levels. Doing air sample collection at the site perimeter or near or at homes/schools will need to wait until we see if we can come up with a health screening value. I am about to restart trying to coordinate work on a screening level.

Sampling at the site will require coordination with Melissa Linden, R3 OSC most involved at the site.

(Have to go to a meeting offsite in a few minutes. Be back after 3 pm. Available anytime by cell phone tomorrow).

Jack Kelly
On Scene Coordinator
EPA Region III, Philadelphia

Subject: Final SOP for 4-MCHM in Air

Jack ,

Please attached find SOP for 4-MCHM. If there are any question , please let me know .

Thanks

Raj

PS: the air sampling sop will be provided at a later date after field trial or simulation in the lab using chamber .
